

Code:

// Arduino to 16x2 LCD Display using Proteus

```
#include <LiquidCrystal.h>
```

```
// RS, E, D4, D5, D6, D7
```

```
LiquidCrystal lcd(7, 8, 9, 10, 11, 12);
```

```
void setup()
```

```
{
```

```
    lcd.begin(16, 2);
```

```
    lcd.print("put your message here");
```

```
}
```

```
void loop()
```

```
{
```

```
    for (int i = 0; i < 13; i++)
```

```
    {
```

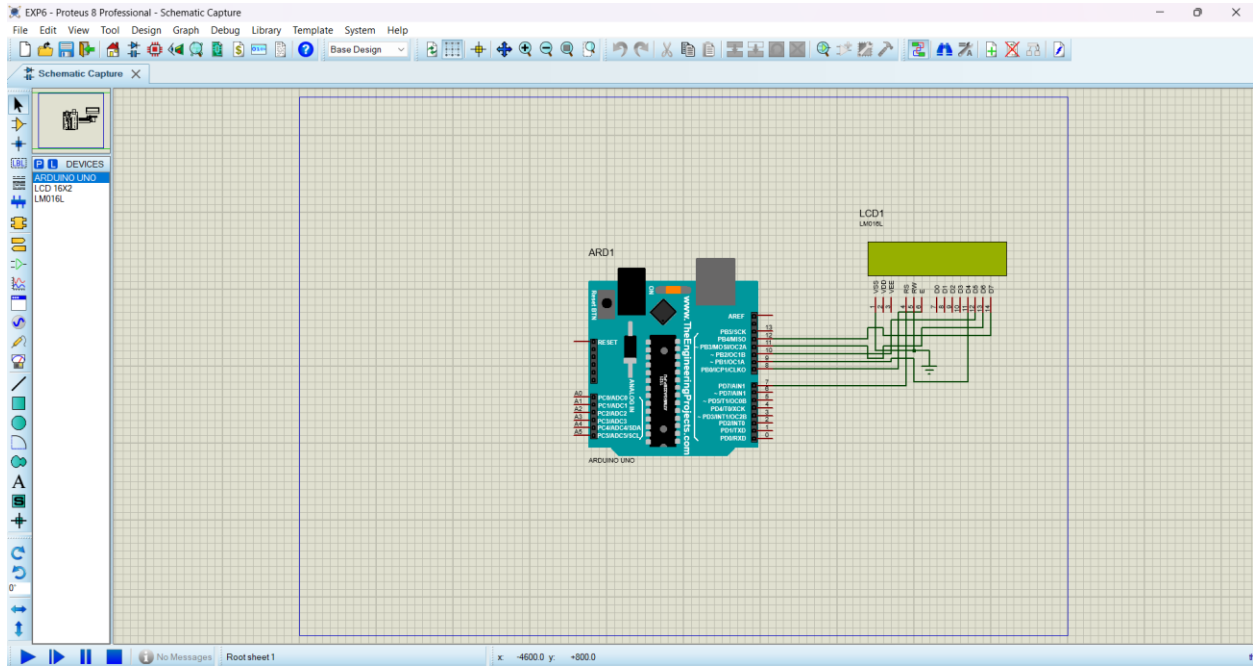

```
        lcd.scrollDisplayLeft();
```

```
        delay(700);
```

```
    }
```

```
}
```

Input:

Output:
